Booking Event & Management System

It is a web app Use to book or post events shows and movies. After confirming the payment, it generates a ticket QR Code of the show, which can be verified during entrance of the show by the verification Page of the app.

KEY FEATURES

- It uses own storage to store the images at the server through Multer.
- Search field is optimized by Mongo dB queries, and data is filed with fake entries about 200k fields to check the performance.

Tech Used

- React,
- Express js
- MongoDB,
